

## Type H-410

### Six-way Adjustable Heavy-Duty Industrial Hinge With Custom Strap Length

High capacity, heavy duty, precision made hinges provide an easy means of installing large industrial doors with proper fit-up, insuring trouble-free operation.

Extra heavy-weight, corrosion resistant, ductile iron pintle and hinge strap and lifetime lubricated oilite bronze thrust and radial bearings assure finger tip operation.

Standard offset permits door to be mounted flush with face and of frame. (Special offsets available upon request). Patented adjustable feature allows hinge and attached door to be positioned in or out, right or left, up or down for perfect alignment and plumb swing.

Note: Neither hinge strap, nor pintle need to be removed or loosened to make any adjustments.

Hinges furnished completely assembled with mounting screws ready for installation. Standard finish U.S. Prime, other finishes available.

Standard weight with 15" strap 17 lbs.

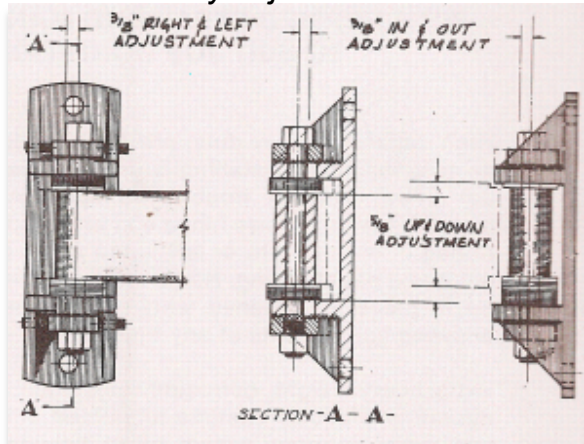

#### Options:

Zinc-Nickle Plated

Security Fasteners (non-removable)

#### Six-way Adjustment Feature
